

Properties

- Krill Omega 3 contains the very pure lipid extract from the crustaceans Antarctic krill (Euphausia superba), and is rich in omega-3 fatty acids. The important components of Omega-3 fatty acids DHA and EPA are bound to phospholipids (= natural ingredients of the cell membrane) and promote absorption, even for people who have difficulty digesting fat and easily suffer from acid belching. The capsules have no fishy taste.
- EPA and DHA contribute to the normal functioning of the heart. * DHA contributes to the maintenance of normal brain function and normal vision. **
- The lipid extract is obtained by cold extraction of the Antarctic krill. This is a small shrimp-like crustacean from the Antarctic Ocean whose scientific name is Euphausia superba. Thanks to the origin of the krill and the original extraction process, Krill Omega 3 is a very pure product to which no preservatives have been added.

What is the daily reference intake and instructions for use?

2 capsules a day, preferably in the morning during meals.

Due to its unique composition, Krill Omega 3 does not cause belching.

Composition:

2 capsules contain:

Lipid extract of Antarctic krill (Euphausia superba)	1000 mg
Of which: Phospholipids	430 mg
Omega-3 fatty acids	240 mg
Of which: EPA (Eicosapentaenoic acid)	135 mg
DHA (DocosaHexaenoic Acid)	65 mg
Astaxanthin	0.100 mg

Is Krill Omega 3 well tolerated?

Krill Omega 3 is a natural substance and is very well tolerated. Does not contain gluten, yeast, sugar, preservatives, artificial fragrances, colors, and flavors.

Does Krill Omega 3 meet high quality standards?

The quality of Krill Omega 3 has been strictly checked and meets the highest standards. Thanks to an optimal purchase price and production process, Krill Omega 3 - 7bees meets an excellent price/quality ratio.

Attention

Krill Omega 3 - 7bees is a dietary supplement and should not be used as a substitute for a varied and balanced diet and a healthy lifestyle.

Consult your doctor if you are allergic to seafood and/or shellfish, if you are taking anticoagulants at the same time. Discontinue use at least 2 weeks before surgery because of the blood-thinning properties of the lipid extract of krill.

Keep out of reach of children.

Do not exceed the indicated daily dose.

Store in a dry place (15-25°C)

Krill Omega 3

List of ingredients

Lipid extract of Antarctic krill (*Euphausia superba*) - Casing: Soft capsule: gelatin (fish) - Casing: Glycerin - Water

Presentation

Stand-up pouch with 60 or 180 capsules.

Notification number: NUT: AS 2263/12

* The beneficial effect is obtained with a daily intake of 250 mg of EPA and DHA

** The beneficial effect is obtained with daily intake of 250 mg of DHA.
